Cero-Gel

Cero-Gel is a high quality polishing agent based on cerium oxide, developed specifically for the glass and window industry. Hairline scratches, the first signs of glass corrosion or stains caused by cement, concrete or silicone can be easily removed. Cero-Gel can be applied using the Bohle felt polishing wheel BO 5007901 together with a cordless drilling machine or, for larger surfaces, the Flex glass polisher BO 5300809 together with felt disc BO 5300811. For final polishing, we recommend Radora Brillant BO 5008003 or simply clean with water. Handy aerosol can. Simple application and immediately ready to use. Polishing gel - no dripping, even on vertical surfaces. Can be applied in any position.

Xtragrip MS Polymer

Xtragrip® MS Polymer is a mirror adhesive with a very good initial tack. It is suitable for tension-absorbing mirror bonding as per DIN EN 1036 on all common substrates. Xtragrip® MS Polymer stands out due to its fast curing speed of 2-3 mm/ 24 hours. The adhesive is neutral and free from silicone and isocyanate. It has excellent low-emission properties and is EC1 PLUS R certified. It does not affect mirror coatings manufactured according to DIN EN 1036. Porous surfaces must be pretreated with a primer. Cartridge 290 ml. Packaging unit 25 items.
